

When Princess Kay and her ordinary twin brother, Prince Jay, decided to run away one day they did not have a clue what amusing adventures and double trouble would soon be coming their way.

Yes, much to their dismay, as they took their first few steps astray on that day in May they quickly noticed not all was going okay in their naughty confused play.

No, not everything would go as planned on that morning's flight into Buggy Land, and the twins would soon find themselves in an awful plight.

Yes, in a fight for their lives after meeting some nice lice, kind flies, neat ants, grouchy rats, and cranky bats things would change overnight. So in greeting more uckies, and seeking the eekies, things were not what they seemed as an icky rash would appear quickly from the kids' heads, cheeks, knees, to their feet!

No the kids were no longer having fun on their running away day in the sun! But they were learning very valuable life lessons about love, being kind, staying home, roaming, and not running away!

Yes, they were learning a lot about what not to do on that first day in May. But for that to make sense to the sweet twins, Jay and Kay, they would first go on a buggie hunting mission, and then out to tea with the fleas, while meeting Slimy Slim the singing Slug Bug, Mikey Ben the guitar playing Vampire Fly, Dee Lynn the dancing centipede, and Timmy Glenn the football playing caterpillar feller.

Yes, including eating a cookie that made them feel ookie.

Oh no! But first, they would also get caught in a frozen rain that shelled them with icy pain. Yes, the blue two running away would find friends and foes in a dark haunted cave.

The twins would also get lost in a forgotten spotted swamp filled to the brim with cranky ants, batty bats, dirty rats, and hissing alley cats who were playing hide and seek games, while staying behind the rocky gate, peeking and peeping waiting for the kids.

Ah, but this would just be the very start of their magical adventure and reality woes, while they were chasing the fairy tale, and tracking the Fairies' tails, watching as their childish royal itches would grow. But for the best of the rest, and to see how the wind blows, you will have to read on some more to see how the story goes!
